DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 – 14 and 23 - 33, drawn to an article, classified in class 428, subclass 144.
 - II. Claims 15 - 22, drawn to a method, classified in class 156, subclass 60.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group II, claims 15 – 22 and Group I, claims 1 – 14 and 23 - 33 are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by a materially different process success as extruding a layer of binder material on the non-adhesive side of the tap and embedding the beads into the surface.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, different modes of operation, different functions, different effects and their divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1772

4. A telephone call was made to Stephen Jensen on November 15, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patricia L. Nordmeyer whose telephone number is (703) 306-5480. The examiner can normally be reached on Mon.-Thurs. from 7:00-4:30 & alternate Fridays.
